

Materializa

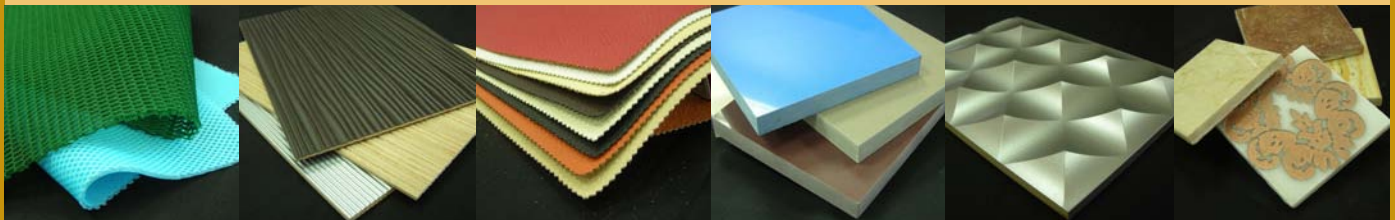

AIDIMA (Furniture, Wood and Packaging Technologic Institute, located at Valencia (Spain)) have created **MATERIALIZA**, a library of materials whose aim is to have information and samples of new materials of any application sector, to facilitate their use in the furniture sector.

The materials that compose **MATERIALIZA** needs to have an innovation aspect, in the material, in the transformation or use, or because the material contributes in the added value of the product (environmental, technological, formal, etc.). Surely your company has materials for **MATERIALIZA**. If it's the case, you can register your inscription and send it by mail to aidima@aidima.es.

The team of **MATERIALIZA** will contact with your company to obtain more details of the material and validated the registration, after that AIDIMA will integrate the material in the physical library and the data base online. The material will physically be in the AIDIMA library where could be consulted in July 2009, and via the Website of AIDIMA: www.aidima.es

Thanks for your collaboration.
